Launching On a Budget: Crafting a Less Expensive Course I just came off an idyllic trip to Costa Rica. It was a wonderful way to observe a place, people and culture all at once. For future vacations, I'm going to make sure to allocate a reasonable amount of time to actually learn a little something about the place. I want to experience the culture, see a show, taste the food, put a face on the people, and get a sense of the daily life. When it comes to course creation, however, it's easy to forget that most people need to cover a certain level of the curriculum to actually complete a course. I'm going to make sure to build courses that will cover the minimum amount of content required. Let's have a look at how this works with one of my favorite photography courses, and how the process took shape. Starting with the Course I decided that the perfect course would tell a general story of how to photograph a very specific location on earth. I had spent years studying the world around me, looking for that one place that I could experience and perhaps even write about for my readers. After a few trips, here in Costa Rica, I finally saw the Golden Dome of Monteverde and just had to share it with everyone. It was easy to envision the types of photos that one might take while on a mountaintop where the cloudless sky and mountain views take your breath away, and you can almost smell the pinole grass in the nearby meadows. The course sounded like fun, and best of all, it was the perfect excuse to take a vacation day and hike up a mountain. With just the right camera equipment in tow, and a talented, dedicated crew, we would bring a new dimension to photography. How the Course was Born In short, here's how it came to pass: #1. The location in Costa Rica. I have a list of locations that I've researched and studied. My first choice was the Monteverde Cloud Forest. I used Google Maps to obtain images of the topography and surroundings. Doing so, it became immediately obvious that the surrounding was an unforgiving landscape of steep cliffs and daunting high mountain peaks. #2. Planning. Early in the project, my team and I spent hours brainstorming about where to take photos. Some of the ideas were downright ridiculous, even by my

. "But the other guy shows up on a notepad with this all-over-the-place verbiage and his stance is very, very unfiltered and sometimes, inarticulate. So, I think that's what part of people are trying to point out." With a first-run feature of "Dunkirk" commanding a reported \$125 million, the plan to release the next "Star Wars" movie a year later apparently was doomed from the start. Hasbro has taken a laissez faire attitude on the matter, citing the advance of the Internet and its ability to serve as a dumping ground for just about any type of material, from the Jabba's Palace shoot-out scene in the original "Star Wars" movie to the Peter Mayhew hoo-ha around 1983's "Return of the Jedi." "Star Wars" came out in 1977, when the television was the first medium for mass market entertainment. It's been seen on TV and video, with commercials, merchandising, and TV channels where it's now possible to home-video tapes, VHS or DVD. Star Wars kits, toys, trading cards, action figures, books, light sabers, clothing, movies and an "Uncle Yoda" or two are available. Costumes are made. Now we have the Internet that many associate with child porn and personal "sites" that specialize in adult-child sex, to say nothing of "trash" games. "They just don't care," wrote Robert Mura of Fort Wayne, Ind. in a post on the Internet Movie Database boards when he discussed and revealed his 1985 strategy for keeping the "Star Wars" movies from riding "Fievel Goes West" into the garbage bin of history. "I made several copies of the unedited original and left them scattered around town. A friend also helped, by giving me a copy of 'The Empire Strikes Back' to trade with him. When 'Star Wars' started to tank, I knew the job was finished. The original film has been displayed on occasion, but nothing serious. Star Wars will be less than a household word by the time 'Episode 7' comes out."Q: Setting global variable from Console app
