What's New In Live Messenger Sniffer?

Live Messenger Sniffer is a real-time monitor and recorder for Windows Live Messenger (MSN Messenger) which allows you to watch every chat, voice or file transfers occurring on your network. Targetted users: Live Messenger Sniffer can intercept Live Messenger or MSN Messenger activity on any computers on your network. Features: Live Messenger Sniffer supports all versions of Windows Live Messenger from 3.0 to 4.0 (inclusive). Requirements: Windows OS 2.0 or later with NET Framework 3.5 or later installed. Configuration: Live Messenger Sniffer is a monitor only software. You have to configure the Live Messenger Sniffer before you monitor. You can choose one of two methods: • Manual method: Define each user name and password for Live Messenger Sniffer by yourself. • Program installer method: Live Messenger Sniffer includes a program installer to make it automatic to connect to a computer. Live Messenger Sniffer has three modes to choose: • Network mode: Connect to all Live Messenger users on the target computers. • Local mode: Live Messenger Sniffer will start to sniff Live Messenger activity on the specified computer when you start to monitor. • Remote mode: Live Messenger Sniffer will start to sniff Live Messenger activity on the specified computer when you start to monitor. Running: After you run Live Messenger Sniffer, Live Messenger Sniffer will automatically start to sniff Live Messenger activity on the specified computer (may take several minutes). Tips: Live Messenger Sniffer has the ability to auto-start to sniff Live Messenger activity when you turn on your computer. Just add Live Messenger Sniffer program installer to your computer startup list, and Live Messenger Sniffer will start automatically. Security: Live Messenger Sniffer is a monitor only software. You don't need to install Live Messenger Sniffer on the monitored computers. So there is no security concern. Reporting: You can view and export logs for each user or selected user in a Excel or XML format. Help: Click Help menu and go to Technical support to contact support. About the software: Live Messenger Sniffer was written using Visual Basic .Net 2.0 and Java 2 Platform, Standard Edition 6.
