Vista, reduced the effect of the dependency for the socket on the

server. v2.0 - 27-Jul-2006 Added the ability to play the Video on the local computer (to run the application)

instead of the Windows Media Player

MegaEPG Free

MegaEPG is a unique tool for effective Electronic Programs Guide

gathering from the Internet. It's based on newest open source project, which is MTV3. MegaEPG can grab "Electronic Program Guide" from MTV3 RSS and convert the data into most popular XMLTV and Media Center Edition native formats. In case of "MegaEPG", there is no need for using 3d-party solutions (no Java, no.NET and no additional run-time environment). In contrast to 3d-party solutions, MegaEPG doesn't require any configuration, as MegaEPG comes up with all of the settings if you use "my config.xml". So here is a brief description of the key features

of "MegaEPG": - No prerequisites. MegaEPG does not require installation of any additional platform/run-time environment (no.NET, no Java/JRE, no 3d-party software). It works just out of the box. It does not install anything into the system directories and cleans up completely when removed. - Windows Vista and Media Center Edition 2005 direct import (native guide format). No 3d-party software required. - Very thorough processing, obtaining as many of XMLTV attributes as possible: categories, movie length, production year,

episode number, original name and so on. - IMDB rating for movies. - Rich scripting API to apply for new listings sources. - Support for alternative listings (in Israel ynet, walla). - Support for automatic alternative choice (essential for Israel where existing sites with listings have frequent shutdowns or sudden lack of listings for specific days). - Smart show descriptions downloading, including weekends and holidays. Official Israel holidays are defined for the upcoming year. - Support for different languages (Hebrew and Russian for Israel) and even mixing

languages within the XMLTV. - Support for Unicode and different encodings. - Easy configuration wizard. - Cache system to reduce the amount and time of download dramatically. Rerunning the MegaEPG with the data cached completes in just a second. - Platform independent and ready to serve Linux-based media centers. Works in Linux smoothly with the wine project. - Fair use of providers' resources. Makes delays between channels downloading, yet EPG processing is still fast. - Support for channel icons. - Categories translator into standard

Windows MCE categories. - Log
emailing feature that allows you to
receive the status of EPG
downloading and 09e8f5149f

MegaEPG allows you to easily process the information presented in XMLTV EPG sources. It can be configured to get up to date information directly from the internet, or from a local database. MegaEPG grabs XMLTV listing from a series of sources: [?] New data from imdb-pro.com. [?] Internet movie databases: imdb.com and maybeyork.com. [?] Internet television databases: tv-ma.info and vk2.video.kz. [?] Israeli television databases: ynet.co.il, walla.co.il,

bein.co.il, fnn.co.il, and hoy.co.il. [?]
Synchronicity.com for US channel listings. [?]
Sothink's TVMOPP for indian channel listings. [?]
Billboard.com. [?]
Openx.tv for listing feeds. [?]
Yahoo cinema. [?]
Online media database: bbc.co.uk. [?]
To convert the XMLTV information into popular formats: MCE-XMLTV or Windows MCE native XMLTV/WTV format. Advantages: [?]
Fast processing. [?]
Flexible. [?]
Easy to configure. [?]
Easily support for new sources with only a simple change in the configuration file. [?]
Import music, radio and weather channels. [?]

Uses minimal resources (to extend the small install size of the engine, you can use a simple standalone version without any setup). [?] Free. [?] Uses Open XML standards. [?] No need for additional software or SDKs. [?] No prerequisites. MegaEPG Requirements: [?] Microsoft Windows Vista. [?] Media Center Edition 2005 (or other free software that has XMLTV format). [?] Internet Explorer 8 or higher. MegaEPG Installation: Do not copy any file into the program folder. The MegaEPG is a small standalone 32-bit application: no installation is required. MegaEPG

Installation... To install MegaEPG, just run the executable file "mce-xmltv". After the installation, you can see the installation directory and the config.xml file. Run the config

What's New in the?

MegaEPG is a useful Electronic Programs Guide grabber that helps to gather and display TV programming from the Internet sources on your Windows PC. It has also support for guiding through the local TV signals on your Windows system. Try it now: Download and install the free version

of MegaEPG: *Free Version available. *Log Files available. *Supports.NET and Java Runtime Environment. *No installation, just grab the applet, edit settings and go! Support for MXF, H.264, MPEG-4 TS/MPEG-4 MP4, Windows Media Format, Windows Media, Windows Media DRM... MegaEPG Comes with "MegaGrabber Control", a simple applet that works with any Windows application that uses the user32.dll library. Install the standalone version and run the program you want. Simply point to it with the "Instance name" option in the applet settings.

Configure the applet with the parameters you need (source, quality, encoding and others) and get the XMLTV from the Internet. Configure the applet to be launched at start-up. You can use a centralized log, so you can monitor all the downloading from all the lists, and alert of stalled jobs. Email alerting so you are informed by email whenever a change is made on the XMLTV, and receive clear text reports of all the jobs. Installation and Uninstallation: One time installation is required. Run the applet in "standalone mode". Setup the necessary settings for your

preferences and fill the details according to your parameters. Manual install without admin rights will be enough. Restart the applet afterwards with Admin rights. Select the "Run as administrator" option in the "Property" tab. Brief usage: Select the XMLTV file you want to process. Choose the config settings and start processing. Manual process control can be done in the "Property" tab. Splitting function is also available. Restarting the applet is completely free. Downloading: Download the Megagrabber.dll file and place it in the C:\Program Files\Open Source

Software\MegaEPG\bin RADIUS
Catalog: Not supported. Automatic
alternative choice: Ynet (Israel). Not
supported.
