Some examples: Es ist zu essen (to eat) Er isst zu essen (he eats) Er isst. (he is eating) Er isst gern. (he is a foodie) Er isst zu schnell. (he eats too quickly) Er isst zu oft. (he eats too often) Is it really important to say es instead of die when referring to food? What do people mean by "to eat" in general? A: Es and die are both suitable to refer to food. The difference lies in the semantic field: Es is ein Nahrungsmittel; die ist ein Nahrungsmittel. Es ist eine Erfahrung; die ist eine Erfahrung. Es ist eine Begrüßung; die ist eine Begrüßung. Es ist eine Leistung; die ist eine

### What's New In StopWatch?

StopWatch is a small software application developed specifically for helping you time all sorts of activities with the aid of a stopwatch. It can be deployed on all Windows flavors out there. Portable running mode You do not have to follow the steps included in an installation process because the tool is portable. You can drop it on pen drives or other portable devices to have it with you all the time. In addition, you may open it without administrative privileges. Since it does not populate your Windows registry with extra entries and leave other setup files behind, you can get rid of it using a quick deletion task. Plus, you may run it directly from the storage device. Straightforward design You are welcomed by a clean and simplistic layout that integrates all dedicated parameters into a single panel. StopWatch does not come packed with complex configuration settings so you can decode the implemented ones in a short amount of time. Time all sorts of activities StopWatch offers you the possibility to start, pause, resume, or stop the timer. The time is displayed with big digits in the main window so it's clearly visible. What's more, you are allowed to record multiple time laps directly in the main window and browse throughout the captured time values. Tests have pointed out that the application carries out a task quickly and without errors. It does not eat up a lot of CPU and memory resources so the overall performance of the system is not affected. Final remarks To sum things up, StopWatch comes bundled with several simple and efficient options for helping you find out how much time you dedicate to different activities, and can be configured by rookies and professionals alike. On the downside, you cannot work with a countdown timer, customize the looks of the utility, and copy time lap data to the clipboard, just to name a few suggestions.
