Fake News Debunker For Chrome Crack + Download [Win/Mac]

You can install this extension on the Chrome browser and use the extensions to view the facts or the lies in the news. It's the simplest way to check if a news article is true or not. It helps to analyze articles in the media by looking for the sources of information and the rights to the images. It also supports video analysis, i.e., the OCR or forensic features for pictures. Here are the main features:

- Filters for the media analysis: you can analyze the media using different filters such as compression, manipulation, cloning and so on.
- Forensics feature: you can use it to analyze the images and videos in the media, as the keyframes and the metadata present in the image can be found.
- Reverse search for media: you can paste the link of the media and get the results, in addition to the results obtained using the reverse search.
- Media analysis: for analyzing videos, you can use the different video search engines, to understand the origins of the video content.
- Google, Bing, Baidu and other engines: with the easy to use filters and search, you can use it for analyzing the media.
- Classroom: to understand the different methods of making fake news.
- Gaming: the extension allows you to check the facts by playing the games.
- Information: it will provide you with the sources of the information and the rights of the images.
- Features: there are features for the navigation.
- Fact Check: it will provide you with the details of the articles.
- Fake News Debunker: it will provide you with the facts about the articles.
- Interact with the extension: you can use it to add to the fact sheet of the article, to make corrections or to remove the article from the fact sheet.
- Manual: it has the function to remove the articles.
- Save: you can save the articles to read them later.
- Tools: there are different tools for the help.
- YouTube: you can easily look up the videos in the YouTube.
- Video source: it gives the source of the video in the media.
- Show link: it shows the real link to the video.
- Why it's true: the article helps to understand the authenticity of the article.
- What to believe: it shows the articles and why they are fake.
- When to believe: it shows the time of the article.
- Where

What's New In?

A comprehensive toolbox to analyze fake news. Description: If the scary screen is not enough to frighten you away from digital photo manipulation, then this is your chance to check every aspect of a picture for suspicion. This extension offers a series of filters, including: - Reverse OCR - Photoshop Cloner - Clone Detection - Reverse Search - Watermark Detection With each filter, the program allows you to see the processed image on the left, while on the right you can check which can be analyzed in the original picture. Supported platforms: Chrome, Firefox, Opera, Brave, Safari Description: Detects manipulated pictures or videos in real time. Very easy to use, users can find possible manipulated images, pictures or videos on a page, by uploading an image or video. Installed and active on a web page. Click on any image or video to open it in a new tab. Click on another one, and a comparison will be done. Click on a picture or a video to open a comparison between a filtered image or video and the original. You can then check the origin of the picture, as well as the date it was taken. If you think there is a mistake, you can propose a correction or remove the image. If the correction is accepted, the file will be deleted from the local computer. Description: Detects manipulated pictures or videos in real time. Very easy to use, users can find possible manipulated images, pictures or videos on a page, by uploading an image or video.
