The moon sizzles the sky on the ducking mountains and the sun of the mountains is poured down on the great sea like hands caressing the edges of the earth and the great ocean sweeps all toward the tropic of Capricorn and the small waves are the birds and the land is the wide open road to the sun where our children and their children and their children are roasting and cracking all the way up to the hollow bone. Yes, there is a blessing on this time and it is in the reaching out of the arms of the birds with their flapping wings to make love to this wonderful God and it is for the tearing off of the hands that hold too many gods and walking down the road with this vast sea to meet the sea where all the lands are made and all the earth becomes one. There is a blessing on this time and it is for the making of the rain and the making of the snakes and the crawling and the quickening of the frog and the making of all the women and all the men and all the children who come on earth in this time of making. The moon is a wonder in the middle of the night and the moon is a wonder in the day and the sun is a wonder in the day and the moon is a wonder in the night.
