Chocolat Messenger for Windows Live Messenger is a basic instant messenger that allows you to chat with your Windows Live Messenger contacts. There are already a bunch of similar apps on the market, but Chocolat Messenger is a bit different because it only boasts very simple features and a minimal interface. The appearance however is terrible and although it helps the app serve its purpose, it's far from what you may expect from this kind of tool. It looks old and outdated and you may even need a couple of minutes to figure out how to use the program. First of all, you need to configure you Yahoo, WLM, AIM or ICQ accounts and you have nothing else to do than to input the username and password. That's basically the whole configuration screen, so all features are grouped right in the main window. While also offering conference support, Chocolat Messenger also includes emoticons and a basic

email checker for Yahoo and Hotmail accounts, thus letting users know when a new mail lands in their inbox. Plus, a file transfer utility is also available, and so is an archive to access the previously logged conversations. Other than that, Chocolat Messenger remains a basic piece of software and, as you can see, it comprises a very limited number of features. That being said, Chocolat Messenger is just an interesting idea, but it needs a lot of major improvements to become a top product. It's stable and reliable, but it simple lacks many important features and an appealing interface. Chocolat Messenger Description:

It doesn't matter if you're looking for a messaging app, a group texting app, a game, or a chatting app. They all belong to one category. These are the apps that let you chat with your friends in real time. And when we say real time, we mean real time, like right now, right here and right in the moment. Basically, this is an app that works just like video calls. Except, it happens in real time and it allows you to send

videos too. Zalo isn't the only app that lets you chat with your friends in real time. There are many others out there that you can try out, but to save you time, we've listed down the best in our opinion. 1. Zalo 2. GroupMe 3. Snapchat 4. Facebook Messenger 5. Line 6. Kik 7. WeChat 8. Whatsapp 9. Telegram 10. Skype So, this is what we recommend. It doesn't matter if you're looking for a messaging app, a group texting app, a game, or a chatting app. They all belong to one category.
