What's New In?

Audio/Video To MP3 Maker is a very easy to use Windows software solution designed for a seamless conversion of audio and video files to MP3 format. It's almost impossible to get lost in the program's GUI, as it comprises only minimum options, all of which allow you to convert files to MP3 with no fuss. The one-window interface is the one taking care of everything, prompting users to open the multimedia file they wish to convert and set start and end times. What's more, a built-in player is also available to listen to each file, while dedicated fields enable you to choose the output format and the destination folder. Audio/Video To MP3 Maker supports a wide array of formats, including AVI, VCD, MPEG, WMV, ASF, OGM, DAT, MPG, WAV, WMA, AC3, OGG, MPA, MP2, AU and AIF, all of which can be converted to either MP3 or WAV. Unfortunately there are no configuration settings to play with and batch conversion is not supported, but instead Audio/Video To MP3 Maker offers a decent help manual to help users throughout the entire process. On the good side, Audio/Video To MP3 Maker completes each conversion task in no time and doesn't affect system performance, while working flawlessly on all Windows versions. All things considered, Audio/Video To MP3 Maker is indeed a fast solution to convert multimedia files to MP3, but it lacks configuration options and batch conversion, two of the most important things of such a program.
