Search for files based on their dates If you want to narrow down the results list, you can set the app to look only for files that have been created, modified or accessed within a certain time range. When you use this function, Isim Software Folder List Print allows you to enter the exact date, including the day, month and year, which can come in handy when searching for a specific file in a large folder. Customize the output file list The application offers you the possibility to modify the filenames included in the generated list. More specifically, you can add several prefixes or suffixes to each filename, so that additional info is visible without actually opening the file. You can add sequential numbers, full path, file extension or size (in kilobytes), as well as creation, modification or last access dates. Furthermore, you can have the app calculate the checksums for each file and displays them within the filename. The supported checksum types are MD5, CRC-32, SHA-1 and SHA-256. Save the generated list Once this step is completed, you can export the list to a TXT file (unfortunately, support for additional formats, like CSV, is not included). Alternatively, you can save it to clipboard and paste it within a document of your choosing. 30 Nov Murasaki Compass Program Murasaki Compass Program can be used to determine the direction to a selected point (specified by coordinates) using a compass rose.
