If there are any other helpful tips that you can offer, please let me know. A: Although I'm not familiar with either of the two languages you're working with, I'm going to guess that the lack of a caret at the end of the phrase is the "end of line" character, which gives Python this unexpected result. I would try replacing it with a small space.

1. Technical Field The present invention relates to a liquid ejecting apparatus such as an ink jet printer, a head driver, an ink jet cartridge, and an ink jet recording method. 2. Related Art In the past, a liquid ejecting apparatus (hereinafter, also referred to as a "printer") has been provided which applies, to a recording medium such as paper, a liquid droplet ejection recording method. In such a printer, there is a risk that the liquid droplet ejection capability (i.e., the ink ejection capability) deteriorates by changes in the environment in which the printer is used, such as temperature changes or variations in the ink ejection speed. The liquid ejecting apparatus of JP-A-2009-289358 includes a humidifier, a humidifying heat source, and a controller. The controller performs, in consideration of the ejection characteristics of a head, a judgment on an optimum temperature or an optimum humidity for use in printing operation, based on a print data value output from a printing target. Specifically, the printer discriminates the temperature or the humidity in the vicinity of the nozzle in the head from the temperature or the humidity in the vicinity of the heater of the head. A judgment is made on whether or not the temperature or the humidity in the vicinity of the nozzle is optimum. If the temperature of the ink ejected from the nozzle or the temperature of the ink in the vicinity of the heater is not optimal, there is a problem that, when the ink changes in flowability due to the temperature changes, the ink cannot be normally ejected from the head, or the ink is ejected at a low ejection speed or with a low ink ejection capability.

1. Field of the Invention The present invention relates to a display device and a method for controlling a display device. More particularly, the present invention relates to a display device capable of improving a display quality while minimizing power consumption in a moving picture displaying mode, and a method for controlling the same. 2. Description of the Related Art As is well

Many widgets, menubar, icons, splashscreen and so on can be customized. Make your own user interface and add functionality to every part of your desktop by creating plugins or extensions. The controls panel allows you to configure most of the important settings for Unity, including the starting point for dash searches. Control Panel Introduction. Ayn Rand is notorious for presenting a wide variety of topics in her novels. G. Edward Griffin, author of G. Edward Griffin's *Memoirs of a Student of the Ayn Rand Cult*, recalls that in *The Fountainhead*, "we read about ethics, and railroading, and left-wingers, and pyramidology." In one of the novels, he remembered, "we learned about a secret society of witches, and all that sort of thing." Of course, to a young libertarian and admirer of Atlas Shrugged, none of these things were new. All Rand's works represented a consistent philosophical progression of concepts and arguments building on each other. She believed that the purpose of her fiction was to help listeners learn and practice her philosophy. However, there was one side of her work that was more controversial than any other: her atheism. Because she was a critic of the intellectual dishonesty and false logic of socialism, she was seen as anti-religious. Or at least that was what John Hospers, the founder of the American Institute for Economic Research, led people to believe. Hospers was once a board member of the Institute. He cited her work, in particular, *The Virtue of Selfishness and Capitalism: The Unknown Ideal*, as reasons why Rand represented a threat to religion. Although her works are liberally sprinkled with references to religion, Rand was so strongly and consistently opposed to religion that she was undoubtedly viewed as a threat. Hospers' "factual" basis of the book was that "in the passages cited in my book, in which Ayn Rand attacked religion and the church, she was doing so in a context which was unfavorable to religion." The reason this was bad was because "Rand's central argument was not about religion, but about the responsibility of man to the state." Because she believed that all human interaction was based on mutual benefit and thus all human interaction was moral, he surmised that no one could believe that someone could be morally wrong in their beliefs. Therefore, religion was bad. To attack the main argument of the book on this basis was irresponsible, and John Hospers never
