What's new in The Crow King:

Retainer "The jaw and face of every toad can be changed through the Enchanted Retainer. It is a very simple device. Hold the jaw of a toad in your hand, and light magical fireballs in the eyes of the toad for about ten seconds. The toad will turn to stone. To restore the jaw of the toad, place the jaw in boiling water for a short while. Enchants should be shaken onto toads that are very young, or just hatched, to make sure that they are still alive and healthy. The Retainer is not effective unless the toad is a young one." Mage Training The Mage's Training is a complete life-skills text designed to get other players who are not Mages to play the Mage character role in a Dungeons and Dragons campaign. Who was first to create it? How was it that no others knew of it until it was too late? Do you plan to dismiss any of these questions as casual curiosity? Do not! Anyone can read about magic in books. It is one thing to know about it and another thing to experience it. While knowledge may give one a head start, experience can bring him or her power. Without the technique, the talent is useless. One might read a treatise until midnight, but if one has not practiced it until that time, he or she may as well be talking to a brick wall. Training is the first step, and the Dungeon Master is the expert in such matters. The DM also has a key role in letting
