I want to make a live CD with Win XP on it and want to run this LIVE CD image on other computers in a LAN by using Network Boot. Will it work? Is it possible to use the iso file as an image for usb stick? Are they tools to change images? Thank you a lot! A: 1) For a PXE/NBD boot CD, you need a bootable CD ISO file. 2) To create an image for a USB stick, you need to use unetbootin. For both, you could try burning the ISO file to a CD, but it is not meant to be a "live" CD. It is meant for "install" media. They are not directly comparable (but one can easily be burned to a CD from the other). Make sure you go to the installation documentation at the maker's website. Each has different requirements

As far as I know you can't use password to manage database or u can manage passwords in database but accessing database by passwords is not a good practice so I recommended to use web application like project hosted on appspot or your own web server. you can use this method to insert and update data var db = window.openDatabase("DataBase", "1.0", "1.0", 4*1024*1024);
db.transaction(function (
