[imaipng= Landscape by Night in the St. He said he threw the coins into the air to thank the fishermen for helping to find his ship, calling them his "guardian angels." "It doesn't matter what order I throw the coins in, I'll find the same number in every row," he said. The coins appeared to have fallen randomly, so he repeated the experiment 10 times but with a slight variation. On the 11th toss, he found the same five numbers in the same order as the very first time. The concept that the universe is ordered was key for Newton in his attempts to develop his "mathematical constants theory," which later evolved into the more commonly known law of universal gravitation. Dartmouth College's Max Planck Medal and Prize, along with the Vannevar Bush Award, which is jointly sponsored by the American Association for the Advancement of Science, National Science Foundation, and U.S. A scientist may dedicate a significant amount of their time to a single pursuit. This may be because of their passion for the topic, their love for a particular discipline, or simply for the challenge of it all, but the definition of success can vary. However, no matter a person's aim, success is measured in different ways. These success measures depend on the nature of the research, and the overall goal of the scientist, as well as their research requirements and available time and resources. For researchers, however, it is important to know their success in measuring their growth and changes over time. It is possible to make some comparisons of a scientist's growth by trying to define success by the amount of publications they have produced. While this may be a necessary goal, it is only a measurement of their success, and does not account for the number of publications that they have not made. A scientist can also be considered successful if they have impacted the field of science in some way by influencing future research, and sometimes by influencing society. By this definition, a scientist could be considered successful if they have a great impact on the lives of others, and this can be measured by a great number of people affected by their research. Determining a person's success may be less strict by knowing the institution to which that person belongs. This is because there are many different requirements and goals that research
