Jump out of the airplane in this funny adventure game. Play as a cute bird flying past the enemies in this time trial game. Features: \* Lots of exciting levels to play \* Flexible Gameplay \* Unlock all Achievements \* New Gameplay on New Levels What's New in Version 1.0.1 The game has been optimized to work on mobile devices. Bugs fixed. I am currently working on another project called "Wings on Wings." I would like to get some critical and helpful feedback from you guys. I need input on how to improve the visuals of the game. In particular, I want to fix the collision detection for the bird. I also want to improve the collision detection on the shooting platform. Huge HUGE update, new game, new main character and new high score mode! New jpeg artwork also available in the descriptions. Thanks for your support, I plan to continue making more games! Update: FEB 20, 2015 I am hoping to release a new game this year and i'll continue releasing awesome updates and bug fixes, so keep watching my twitter and youtube! Just a short note to let you all know that due to the recent update, I have decided to go back to working on this series of games and have yet another update ready for release! The new game is called Blinky (I know, I know, I suck at naming games) and it is a physics puzzle game where you are the prisoner of a mad scientist! You start with nothing, but he will give you plenty of powerups along the way. I've also fixed a lot of little bug/glitch/crash issues. This is mainly focused on the new game. I have more plans for this series of games, so more to come. That's it. Tell your friends. I wanted to introduce a new twist to the game: new game. Currently it is over 40 levels with challenging gameplay. Updated: - New Game mode - New game logo - New Musical theme - Music changes - New Artwork - New Character Designs - New Characters - New Display Options - New Inventory - New Gameplay P.S. There are still a lot of bugs, so please help me fix them! Happy pings! I need your help to improve gameplay and porting the game to new platforms. I'm currently porting the game to X

**+ Collaboration By Sam Song Published August 28, 2018 Hello, this is Sam with The Great Sam, I am here with a review of the Gungeon's soundtrack and a little bit about one of the contributing musicians I love Hardcore so much. Through each different niche it has its own style, its own unique journey to the listener, and through the years I have seen many different people carry the Hardcore stamp. From it's roots as a**

**genre of goths and tribal drum and bass to the current renaissance of the advent of Noise, Trap, and other non-genres - Hardcore as a genre has developed into something unique and stands as the cornerstone of many genres of music today. Enter The Gungeon gives a fascinating example to this. Released nearly four years ago, the game had a soundtrack release “Work In Progress” that shared some influences of many different genres and genres. It even shared some influences from other game projects, demonstrating a strong cross-over between genres (ten second sample: Justin Mclean, the composer for Minesweeper) The soundtrack to Enter The Gungeon was a title to behold, and the versatility was certainly awe inspiring. Then, some months ago, as Gungeon had grown in popularity, they officially announced a Day and Date for a soundtrack release “In The Moment”. Now that I have the disc in my hands, it does appear that the project has taken a different sound and this does raise some eyebrows. While the previous release**

**was definitely a departure from the original game, it seemed like this was a more classic theme for the game and it was a good start to the project. Now, months later, Enter the Gungeon has released a full album called 8:13 to the Introduction of Fear. The album was recorded by one of the composers of the game before he committed full time to their gaming projects and has a soundtrack that is more akin to a commercial soundtrack. Now, it is easy to pin point the sound reason why this is, but I can't help but wonder if there is something more behind it than that. Maybe the classic theme was so iconic it was a difficult thing to let go of even after so many months of silence in the game's history. To get an understanding on what Enter the Gungeon was at the time of the previous soundtrack release, I decided to listen to the soundtrack a few times and do a review of my thoughts on**

**[April-2022]**

**Spectromancer is a card game based on a popular fantasy setting of the same name. The setting is a conflict among religious factions, and a lot is at stake. Living creatures are cards, and they gain abilities and powers through multiple forms. You can manipulate this “magic” with spells and spells of your own, sometimes to great effect. The game comes with 4 races and 20 classes of magic user, each with different abilities and powers. As the game progresses you can also create your own templates to mix and match the classes and races to create your own highly customized character, letting you push the game to the extreme! With a wide variety of cards and spells, the game is both easy to learn, but hard to master. Play a quick game online or spend long hours in the campaign and build your character into a powerful hero. Key Features: New Classes and Races - New classes include the sorcerer, the beastmaster, and the demonologist, and each have their own**
