Later, the engine was equipped with sequential injection on the inlet side, which. Motorcycles and Engines.In an injection molding system, when a resin is injected into a cavity of a molding machine, the resin in the barrel of a high-pressure pump is pressurized and the pressure thereof is maintained at a predetermined value or above. The resin then flows into a screw in the barrel of the high-pressure pump to be subjected to compression molding. In the injection molding system described above, in the screw, the resin supplied from the barrel of the high-pressure pump is subjected to compression molding when the screw is rotated. Therefore, it is necessary to keep the resin in the barrel of the high-pressure pump at a predetermined temperature so that the resin can maintain a predetermined viscosity. To this end, there are a heater and a thermostat, which are inserted in the barrel of the high-pressure pump. Further, the pressure of the resin inside the barrel of the high-pressure pump is detected by a pressure detector to keep the pressure thereof at a predetermined value or above. In the prior art, however, it is difficult to stably supply a resin to a screw in a barrel of a high-pressure pump, and there is a problem in that the

I have the following type of classes: public class Post { private int id; private long time; private Location location; private Comment comment; } public class Location { private int id; private String lat; private String lon; } public class Comment { private int id; private String comment; private String time; } I want to save the Post and its comments to a xml file. How can I do that? A: The type of object you need should be Serializable, which means you can also create an object graph of that type and serialize it. The easiest and most standard approach is to use org. ison.XML or lackson for serialization. Either one will work fine, public class Post implements Serializable { private int id; private long time; private Location location; private Comment comment; // leave the others for lackson } private void save() throws IOException { File file = new File("someFile.xml"); file.createNewFile(); try (OutputStream out = new BufferedOutputStream(new FileOutputStream(file))) { out.write(JsonUtils. 6d1f23a050
